Records Are Finally

Accepted.

DR. LUTHER HALSEY GULICK

harbor August 12, 1911, when he broke the world's records for both distances. It was the then refusal of the organ-

American Athletic Union of the United States named the official amateur rec-

ords established during 1912 and allowed the two disputed records of Duke Kahanamoku made in 1911 here in Honolulu. These are final and authorita-

tive and were sauctioned by the A. A. U. only after each case had been inves-

tigated. The list this year is a long one and contains, for the first time, of

years ago yesterday.

Saving Lives With New Oxygen Pump

Case of Drowning or Asphyxiaation Telephone at Once For the Pulmotor.

Call Murray Hill 1212, a New York imber, and the pulmotor will come in Chinzing auto, with the right of way ver al. other traffic, just as the am-And the pulmotor-what is it? It is the newest device to resuscitate

e apparently drowned and people ead—so it would seem—or dying, of as asphyxiation, the fumes of acid, ie gas of mines, smoke, poison, rangulation—anything where the ings must be started again or life ill snuff out.

ill snuff out.
Chicago already has a pulmotor ithin call by auto just as there are re engines and ambulances. New ork's machine at present is temporry, but one will soon be installed as pergent part of the Fire Depart. permanent part of the Fire Depart-ent's apparatus. At present the Con-

The apparatus is so simple that a ian can easily carry it in his hand, and can easily carry it in his hand, t is all contained within a narrow rooden box about the saze of the orinary suitease, and with everything omplete it weighs forty-six pounds. ts chief parts are a steel cylinder of ompressed oxygen, an automatic belows, a valve for mixing air with the xygen, a tube fitted with a rubber task which goes over the mouth and ose and an exhaust.

tose and an exhaust.

The bellows is the real triumph of he pulmotor. It automatically reverses the machine, making inspiration and expiration possible. During he inflation of the lungs there is the ame pressure in both the bellows and he have the bound or filled. he lungs. When the bigs are filled he bellows are inflated, move forward automatically and reverse the valve so hat the force of the compressed oxy-gen is now sucking the air out of the

Even the rhythm of the lungs is pre erved. For large lungs it is slower; for small lungs faster—just as a grown man _breathes slower than a baby. Everything is done by the machine it The operator merely adjusts it; als task is then to pull the tongue out as far as he can with a pair of forceps, keep the windpipe open and see that the gullet is closed by a gentle pres-sure of two fingers.

The machine has saved babies who did not breathe at birth. In Chicago it saved the lives of two women and a little girl who had been overcome by gas from a cook stove. Mrs. Lola Howard tried suicide by gas and it brought her back to this earth after an hour's work. It saved a workman who had been strangled by his jacket

and shirt catching in a press at the Carnegie Steel Company, Pittsburgh. There are twenty-six of these instru-ments installed at the H. C. Frick Coke Company's plant at Scottdale, Pa., and two men have already had their lives saved by them. Forty-one persons have been brought back to life by the pulmotor and automobile sent out on call by the Commonwealth Edison Company of Chicago. A small boy, in the water nobody knows how long, was taken out apparently dead. It took three minutes more to get a pulmotor In five minutes he was shivering and crying and on the way to a hospital to get warm and well.

POLICE OFFICERS IN HOT WATER AGAIN

Kohala Detectives Accused in Court of Perjury-Queer Case of Jailer.

(Mail Special to 'Ine Advertiser.) HILO, December 1.—The police are in hot water again. This time a couple of Kohala officers got into the limelight before the circuit court at Kailua, where they were openly accused of having committed perjury.

The incident occurred in the course

of the trial of one Pang You Kun, who was charged with assault with a deadly weapon. A couple of police of-ficers from South Koham were material witnesses for the prosecution, but the defendant and his witnesses testified

Kaniania, as follows:

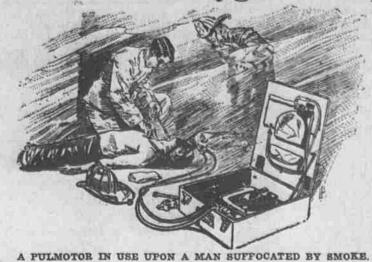

"The grand jury found four indictments against J. Kaniania, two of
which latter contained one count each,
one two counts and one three counts. The Kanishia indictments are now pending demorrer, which was argued some time ago. The demorrers are based

defendant and his witnesses testified that these very officers were engaged in a gambling game at the Japanese hotel at waimen, where the cutting took place, and the attorney for the defense argued expressly to the jury that they had given false testimony. The jary appears to have taken a somewhat similar view, for it acquitted the defendant.

Special prosecutor W. H. Smith, who conducted the case, has asked County Attorney Beers to investigate the matter, unless the sheriff himself sees fit to look into it.

Smith writes to Beers in regard to the case of ex-supervisor, now Jailor Kaninia, as follows:

""Ine grand jury found four indict." Manager Andrew Adams, of Kaluku Jantation, returned on the Handulan category from the mainland.

pointed to receive such funds, namely, the treasurer.''
In a postscript Smith adds that the demurrer has been oversaled.
Smith also writes further:

lient's apparatus. At present the Conplidated Gas Company and the New
ork Edison Company have private
sachines for use when their employees
re stricken, in one case by gas fames,
in the other by electrical shock. If
here is a spark of life left the pulmoor will do the rest of the work.

The apparatus is so simple that a
inn can easily carry it in his hand,
inn can easily carry it in his hand,
inn can easily carry it in his hand.
inn can easily car

"The Wilson case has also been con tinned for the term insemuch as on account of the non-arrival of witnesses for both parties it could not be taken up prior to the time when it became no cessary to commence the trial of indictments returned at the present term against defendants who were in cus-tody and who were entitled to a speedy trial, which they could not have had if the Wilson case had been given precedence on the calendar, as it, on account of the necessity of summoning one or two special venires and the na ture of the case itself, would have prob ably consumed all of the remainder of

PORTUGAL SCARED AT DEPOPULATION

LISBON, Portugal, December 1.—The growth of elandestine emigration from Portugal is causing considerable anxiety to the Portuguese authorities and it is understood the Portuguese govern-ment shortly will denounce the Hispano-Portuguese convention of 1897 for the suppression of the traffic.

The measures taken by the Spanish government, it is said, are totally indequate to stop this traffic, which is proving a serious drain on the agricul

tural population.

Labor contractors from Fuentes d'Onoro, Vigo and Cadiz freely engage Portuguese laborers, who are shipped off to North and South America, it is declared, with the tacit consent of the Species authorities in total disregard. Spanish authorities, in total disregard of the provisions of the convention, all complaints from the Portuguese govern-ment passing unheeded.

The result of this traffic is that Port-

nguese emigration to the two American continents, which a short time ago averaged only 30,000 to 40,000 annually has now increased to over 71,000, and the country districts, especially in the north, are threatened with rapid de-

Though the weather has not been very plensant the past few nights, the police were somewhat busy last night and quite a number of people were register-ed on the police station blotter, mostly for minor offenses.

FEMININE RACES TALKEJ ABOUT FOR **COMING CARNIVAL**

As an additional attraction for the coming Mid-Pacific Carnival, which is to wind up February 22 in a blaze of glory and whatnot, a movement is being started to provide a number of swimming races and other aquatic

sports for girls and women.

There was an awakening among women swimmers when little Ruth Wayson Stacker defeated Mrs. Terie Desch a thirty-yard swim here some months ago, and since then quite a number of the gentle sex have been getting into

sportsmen warmed up to the extent of sending Hawaii's champion to the main structing quartermaster at Castner, and the prove over again what he had complished at home. He did this and more, for he was chosen a member of the American swimming team, and at tillery Corps, Fort Winfield Scott, San Stockholm carried the American solutions. The gentle sex have been getting into racing form.

LORRIN A. THURSTON WRITES ON THE BIG OCEAN DISCUSSES TYPE OF BOAT BEST SUITED FOR COURSE

(By Lorrin A. Thurston in San Francisco Chronicle.)

I have read with intense interest the "Chronicle's" statement of the challenge by Sir Thomas Lipton for an international race at San Francisco in 1915, in which race it is proposed that Hawaii shall enter

which race it is proposed that Hawaii shall cated a competing boat, the event to be followed by a race among the same boats from San Francisco to Honolulu. Being at present in San Francisco, I can not say how the suggestion will impress the people of Hawaii as a practical proposition, although it is certainly one which appeals to the imagination. A 2000-mile ocean race by boats of the type which Sir Thomas Lipton, the German Emperor, the New York Yacht Club and, last but not least, the yachtsmen of San Francisco would put affont—each yacht to be accom-Francisco would put affoat—each yacht to be accompanied by a steamer equipped with wireless apparatus, so that each day all of the competing yachts and the world would be notified of the location and doings of each boat—would certainly be the blue ribbon event

world would be notified of the location and doings of each boat—would certainly be the blue ribbon event in world yachting.

As to entering a boat in the proposed contest, I would say that rough water is nothing new to Hawaiian yachtemen. The channels between the Islanda are as rough as they make them and the boys of Hawaii have been brought up on that kind of yachting. Moreover, Hawaii has been participating in transpecific racing since 1906, having entered boats in 1906, 1908, 1910 and 1912, against competitors from Scattle, San Francisco, Los Angeles and San Diego.

The first race was to have been from San Francisco to Homballa, but when the Honolalu boat arrived at the Golden Gute San Francisco had disappeared off the map by the fire route and the local yachts were not of commission. The race was accordingly sailed from San Fedro, the auctions yachtenen accounting the responsibility of defecting the California claim to the cap to such good affect that the California claim to the scap to such good affect that the California claim to the scap to such good affect that the California claim to the scap to such good affect that the California claim to the scap to such good affect that the California claim to the scap to such good affect that the California claim to the scap to such good affect that the California claim to the scap to such good affect that the California claim to the scap to such good affect that the California claim to the scap to such good affect that the California claim to the scap to such good affect that the California claim to the scap to such good affect that the California claim to the scap to such good affect that the California claim to the scap to such good affect that the counter of the scan scan and scanning place Issues in a field of from three to five longs on the counter from the flux at the good and I believe that when the full passibilities of the promond roces are brought home to her people thee flux at the field passibilities of the promond roces are brought faces.

I do not pretend to swim in the same school of fish that Sir Thomas Lipton and the German Emperor do, but I have snuffed salt water enough between Honolulu and San Francisco, and around the choppy channels of Hawaii, to know that racing off New York harbor differs from racing in San Francisco bay and around the Farallones, and that the latter is a "different breed of cats" from a 2000-mile open ocean sail to Hawaii, even over the "Pacific" ocean. The New York summer water is smooth and the

winds light, averaging six to fifteen knots. The con-ditions have bred a racing machine type of boat built of bronze, with a single mast and an immense cloud of sail extending to the almost unbelievable height of carly 200 feet. She can not cross the ocean except under jury rig, the balf the racing height. Such nearly 200 feet.

with a mast less than half the racing height. Such a bont costs to build and operate through one race opwards of \$200,000 and is of little or no use for any I doubt if the recent American cup challengers and defenders could carry their full racing sails in a nor-

mal San Francisco summer breeze, especially off the Parallones, or safely undertake the trip to Hanolulu, without materially cutting down their sail area, and even then the great spread of individual sails on single stickers would make an unwieldy mass to handle in the wind and sea that must be expected.

handle in the wind and sea that must be expected.

I venture to suggest for the consideration of those who will have charge of the affair, and who know infinitely more about the subject than I do, whether or not it will be the best policy to promote a race among single sticker racing machines or whether it will not be more in the inferest of good sport and promotive of really blybgrade yachting to make the specifications for the competing yachting to make the specifications for the competing yachting to make the produce racers but of the substantial occan going type, such as the German Emperor's two mosted Meteor and the Atlanta, the three mosted American schemery which went his last race arrives the Atlanta. Much houst are less expensive to build and operate, can safely go anywhere under their awa racing antic and the for anywhere under their awa recing antic and right and weather and are very easily for their and excitement bunding one of those is a gale of what is seemed to no superiouse as deep water, as around the race from New York to Logical
